

STELVIO S3 CI

3C224N

CE UNI EN ISO 20345:2012 S3 CI SRC

Low shoe, IDROTECH® WRU Nubuck leather and anti-scratch back leather WRU thickness 1,8-2,0 mm.
Soft Windtex® water resistant membrane lining, with very good perspiration and abrasion resistance.
Shoe with refracting fabric insert.
Reinforced heel area STABILITY SUPPORT in PU.
Soft, lined and padded tongue.
CLICK OPEN lacing system.

TOECAP 200J polymeric **composite non-thermic** according to EN 12568

MIDSOLE flexible antiperforation composite fabric according to EN 12568

SOLE 3 CROSS three-densities polyurethane antistatic, resistant to hydrolysis ISO 5423:92, to hydrocarbons and to abrasion, anti-shock and anti-slipping **SRC**

ANTI TORSION insert in the sole to assure stability on uneven ground

CI insulated surface against cold -17°C

INSOLE MEMORY, three-materials extracomfort insole with soft latex Memory no-stress in the heel zone and in the bending point, resistant to the body pressure. Perspiring, removable, anatomic, absorbing, antistatic and antibacterial.

Size 39-47 Shoe weight Sz 42 gr. 600

TECHNOLOGIES AND MATERIALS

SECTORS

SOLE

3Cross is a square-shaped, dynamic and vibrant footwear. This has been designed for those working outdoors on irregular surfaces. 3Cross belongs to the 3D generation. This shoe therefore has 3 different PU injected layers with relative densities, each specialized to maximize comfort, anti-slip and foot stability. Some of these models are also equipped with an antitorsion insert to guarantee further support to the foot at every step.

ANTISLIPPING TEST RESULTS

ANTISLIPPING TEST RESULTS

SRC ANTI-SLIPPING SOLE

SRA ceramic + NaLS	HEEL >= 0,28	0,53
	FLAT >= 0,32	0,48
SRB steel + glycerol	HEEL >= 0,13	0,22
	FLAT >= 0,18	0,22

PLUS

WINDTEX®

Windtex® is an innovative membrane that blocks wind and water, by guaranteeing at the same time a homogeneous transpiration of the foot. The degree of transpiration of Windtex® together with windproof property, allow the maintenance of microclimate of the shoe. This membrane, with technology Aegis®, builds and antimicrobial barrier against unpleasant odors, fungi and other microorganisms.

IDROTECH®

IDROTECH® is a leather treatment with the aim to optimize the water resistance and the foot perspiration. This particular tuning method, thanks to the used mineral salts, gives an excellent softness and a complete mechanical resistance to oils and hydrocarbons. The IDROTECH® leather is certified according to the norms ISO 4045, ISO 17075 and ISO 5403.

STABILITY SUPPORT

Stability Support is the Giasco technology the guarantees the maximum heel support during walking. Inside it there's a particular structure that localizes the support only on specific areas, in order to avoid an excessive stress of the foot. It helps the correct walking and a better discharge of the weight along all the foot, with advantaged for back and joints.

ANTI TORSION

The usage of the anti-torsion shank is finalized to give to the shoe extreme stability on every ground. Mostly indicated for the building sector, where the risks caused by uneven and wet grounds are higher, this technology is very useful for people working on ladders (painters, windows' cleaners, bricklayers) as it increases the stability in the centrla part of the plant, the mostly standed area on the ladder. It limits the heel stress and helps plant arch and ankle.

3D TRIPLA DENSITA' INIETTATA

3D is a revolutionary certified technology that offers the only shoe with three different layers of polyurethane injected. The most external section, with hard mix, offers the maximum resistance for the surface contact and perfect SRC performances. The middle part, with a softer mix, assures comfort when walking. The higher section, next to the upper, guarantees better stability to the foot. Three densities and the combination of three colors are the special characteristics of this new shoes generation.

MEMORY FOAM INSOLE

The MEMORY FOAM insole guarantees an excellent comfort thanks to the innovative material of which it is made, which allows it to adapt to the shape of the foot. This, in addition to making walking more pleasant, supports posture, improves the fit of the shoe and distributes the body weight better. Moreover, this stabilizes the foot and reduces the impact with the ground, absorbing shocks and guaranteeing an excellent shock absorber.

CLICK OPEN

The Click Open system, thanks to the inox steel yarn and to its memory mechanism, assures a safe and uniform lacing. This allows to guarantee the maximum stability during walking and to avoid that internally the foot rubs with the upper. This technology is mostly suggested for people working with gloves, as thanks to the rotation of a simple knob it helps to quickly wear and remove the shoe.
